

WHY THIS MASTERCLASS MATTERS

Water governance is now an executive risk.

Across SADC, water security sits at the intersection of public risk, municipal capability, ESG disclosure, social equity and infrastructure resilience.

- Translate policy and legal duties into defensible action.
- Identify mandate overlaps, escalation routes and accountability gaps.
- Build justice-centred stakeholder and community processes.
- Convert monitoring evidence into executive-ready risk intelligence.

Fee & verified banking details

Fee: R3,950 per delegate
Account: Jamela Resources Consulting (Pty) Ltd

EXECUTIVE WATER GOVERNANCE MASTERCLASS

Bridging the Gap

Policy, Governance and Water Justice

A high-level learning laboratory for water-sector leaders, EAPs, regulators and sustainability professionals.

20 OCTOBER 2026

JEFFREYS BAY • 1 CATEGORY 1 CPD POINT

Lead: Dr Mxolisi B. Mukhawana, PhD

Programme Director & Co-Facilitator: Dr Mhanqwa Jamela, DBA, MPA, MBA

Presented by Jamela Resources Consulting

THE STRATEGIC CASE

Move from fragmented compliance to integrated governance.

This masterclass frames water security as a governance, justice, climate-resilience and institutional-performance challenge—not only a technical resource issue.

Designed for

- Environmental Assessment Practitioners and ECOs
- Water scientists, engineers and infrastructure planners
- Municipal authorities, regulators and compliance officials
- ESG, sustainability, policy and regional-development leaders

WHAT DELEGATES WILL MASTER

Six modules. One practical governance roadmap.

- 01 Water justice as a professional framework
- 02 South African policy architecture and implementation gaps
- 03 SADC transboundary governance and shared vulnerabilities
- 04 Data, climate intelligence and infrastructure risk
- 05 Inclusion, community voice and institutional accountability
- 06 Reform pathways and workplace implementation

APPLIED EXECUTIVE VALUE

Leave with tools you can use immediately.

Included resources

- Policy-to-practice diagnostic checklist
- Governance risk and accountability matrix
- Water justice stakeholder-mapping tool
- SADC basin vulnerability snapshot
- Climate and data-readiness diagnostic
- Inclusive participation and gender lens
- 30-day workplace implementation plan

The professional commitment

Translate the day into one defined action, named stakeholders, required evidence and a measurable completion date.
